BATTERY LIFE CERTIFICATE

PRODUCT LFP12150FTHT 12V150AH VRLA BATTERIES WITH
DESIGNED FLOATING APPLICATION OF 14 YEARS
AT 25 CENTIGRADE DEGRAEES

Note :

1.The positive plates dimensions are 249*158*3.0mm

The negative plates dimensions are 249*158*2.0mm

The material of positive plate are PbO₂.

The material of negative plates is Pb.

The grid of positive plate is Pb-Ca(0.08%) -Sn(0.9%)-Al(0.025%)alloy grids.

The grid of negative plate is Pb-Ca(0.1%)-Sn(0.25%)-Al(0.025%) alloy grids.

2.This battery is with dimensions of 510*110*287mm at present .

Floating life at temperature (60°C)

Battery model : LFP12150FTHT (Gel, 12V150AH)

Method: The battery will be subject to charge at constant voltage (2.3V/cell)
under the ambient temperature at 140°F(60°C) .Then check the capacity
every 3 weeks (3h current discharge up to 1.70V/cell at 77°F,25°C) 3 weeks
are equivalent to one cycle .

Standard: The floating life will be ended if the residual capacity less than
80% of the nominal capacity(C3).

Note : One cycle is equivalent to One year float life at 25°C.

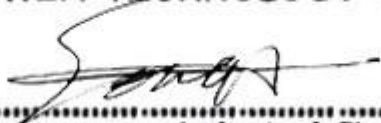

Test results:

Cycle	LFP12150FT HT (12V150AH)
	Discharge time
Initial	3h32min
1	3h34min
2	3h36min
3	3h33min
4	3h30min
5	3h27min
6	3h22min
7	3h17min
8	3h11min
9	3h04min
10	2h58min
11	2h53min
12	2h47min
13	2h42min
14	2h32min
15	
Results	14 cycles

Conclusion :

LFP12150FTHT battery can operate at high temperatures(140°F (60°C) for floating charge over 14cycles, it is equal to battery floating life is 14 years at 25°C(equal to 7years at 35°C)
